WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Columns: two UPN 80, 842 long, webs facing each other, 196 apart (web faces); open sides face outward.
In each web: 4 x 18 holes at 18 each side of centre, 687 and 767 up from the column foot (mold bolts).
In the +Y web only: two 40 access holes on the centre line, 210 and 611 up from the foot (base pin and upper pin).
In the -X flange of each column: 2 x 13.5 holes 32 from the web face, 113 and 158 up from the foot (tie bolts).
Feet: 16 mm plates 140 x 90, 4 x 13.5 holes at 110 x 70.
Beam: two 20 x 100 plates 286 long, on the outside faces of the column flanges, tops 185 up from the foot; the -X plate drilled 13.5 through with the flange holes.
Lugs: two 28 mm plates 80 x 95 between the beam plates, 56 apart inside, with a 46 bush hole 210 up from the foot.
Weld on a flat table; check the webs are parallel and 196 apart.
