WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Bar 60 x 24, 480 long. Centres 420 apart, 30 from each end.
Round both ends to a 30 radius about the centres.
Crank end: bore 30.5 for the 30 mm crank pin.
Knee end: bore 40.5 for the 40 mm knee pin.
The 420 centre distance sets the stroke: hold it within 0.3 mm.
Fit: sits on the centre line between the two crank plates
(4 mm each side) and between the knee spacers.
Check: measure the centre distance with the two pins fitted.
