RIGHT VIEW

Scale 1:10; looking at the right side (along -X)

WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Lever: 2 in schedule 40 pipe, 1,654 long, ends square.
T-handle: 1 in schedule 40 pipe, 500 long, through a 34 hole each side of the lever, 1,604 from the socket end; centre it and weld all round both sides. Rubber grips on both ends.
Locking pin hole 13 across the lever, 179 from the socket end.
The pipe goes 204 into the socket; the grip is then 1,650 from the hub centre.
Fit: slides into the hub socket or the eject socket; a 12 mm pin with an R-clip locks it in the hub socket.
Check: no burr inside the socket end; the pin goes in by hand.
