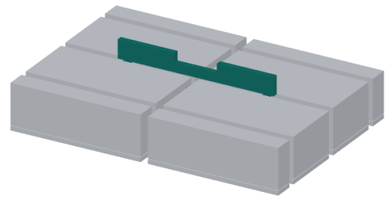
RIGHT VIEW

Scale 1:2; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Bar 40 x 12, 340 long; two legs of 12 x 12 bar, 40 long, welded under the ends, 292 apart inside.

Notch 93 wide and 20 deep in the middle of the top edge.

Length: a good block drops between the legs (292 is the longest allowed, 290 plus 2).

Height: a good block, on its side, fits the notch (93 is the tallest allowed, 90 plus 3).

File the inside faces flat; check with a steel rule.

Paint the gauge so it is easy to find on site.
